

HOW TO JOIN LIBRARYCRAFT

Step 1

Own Minecraft Java Edition

If you don't own Minecraft Java Edition, buy it from [Minecraft.net](https://minecraft.net). It will cost \$39.95.

Choose [Get Minecraft > Computer > Java & Bedrock Edition](#).

Your Java username will be created then. Note that you cannot connect to LibraryCraft using Bedrock Edition - they are just sold together.

Step 2

Complete the form

Visit librarycraft.net/join and complete the form.

Step 3

Send ID to whitelist@librarycraft.net

ID can include a student card, birth certificate, passport or anything official that includes your name and date of birth.

Note that these documents are not kept, only used to verify name and age.

Step 4

Wait to be whitelisted

An email will be sent back in the coming days to let you know if you have been added to the server.

Step 5

Log in!

Once added to the server, log in to the game by starting Minecraft.

When the launcher starts, log in and click [Play](#).

Once the game has started, click [Multiplayer](#), [Add Server](#) and enter the following:

Server Name: [LibraryCraft](#)
Address:
librarycraft.apexmc.co

Once you have done that, you're ready to play!
